EVERGREENS

(Balled and Burlapped)

Our Evergreens are all grown at good distances for symmetrical development, are root and top-pruned into handsome, shapely trees that will transplant successfully if given average care.

Evergreens that are selected and marked by customers in the Nursery will carry a ten per cent additional charge above the following listed prices.

All Evergreens are sold with the distinct understanding that if they arrive in good condition and are accepted, our responsibility ceases.

The height given below represents the average height of the different varieties, if left to grow naturally. Size can be controlled by shearing trees used in foundation and other landscape plantings.

Customers desiring Evergreens with roots puddled can secure them at the following reductions in price:

18 to 24 in. at 15¢ ea.; 2 to 3 ft. at 20¢ ea.

We also have a quantity of large Junipers including grafted types of Chinese, Scopulorum, and Virginiana Junipers running in sizes between eight and twelve feet. Many of these trees are specimen trees. They cover a large variety list with only a few trees of a variety and for this reason we have not listed them under regular variety heading. If you need large Junipers be sure to have us show you these trees and quote you prices.

FLORIBUNDA ROSES

A new classification of hardy everblooming roses for mass color effects. The habit of growth is of medium height. They are very winter hardy, therefore, permanent, disease resistant, and bloom continuously from early summer until Frost.

The Floribunda varieties should be planted in groups of three or more of a kind. They are recommended for use among the shrubs for continuous color, as hedges or as borders, as massed bed plantings for parks and along roadsides.
